## Personal Projects

### **aaronneyer.com.**

My personal website/blog built on Ruby on Rails.

### **Pokemon IRC Bot.**

An IRC bot for playing pokemon games built in Ruby using the cinchrb irc framework.

### **Rs Name Tracker.**

A website where users can enter names in a video game to be tracked, and be notified when the name becomes available.

### **And more.**

All of my projects, including the ones listed above are on my Github, so check that out to see more of my work.
